

Dear Sir or Madam

As we will only accept consignments with bar code identification as from 04.10.2005 we are providing you with a PDF file with which you will be able to establish the bar codes yourself.

The PDF file is readable with Acrobat reader 5.0 and 6.0. The 7.0 version can be provided at the beginning of next year.

The bar code is established according to Code 39 and in accordance with VDA Standard 4902.

Application:

In order to establish the bar codes you need only type over the entries and press enter. The bar codes will automatically change after an entry has been made.

The file only accepts upper-case and cannot be saved. A charge number is only required for certifiable material.

Please apply this label to each package with the amount and weights referring to the individual package. You can minimize the label to DIN A6.

For further information please contact us per e-mail I.tumminello@westfalia-automotive.de or per telephone under +49 (0) 5242 907 125.
