

## 7-pin wiring kits

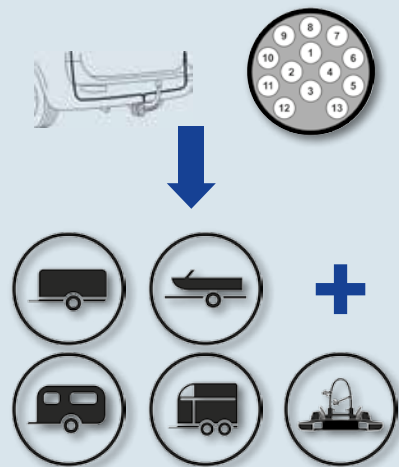

This wiring kit is the economic model with basic lighting functions for the trailer:

- Rear lights
- Brake lights
- Turn signal lights
- Rear fog light
- Trailer turn signal light control

Connecting a permanent positive or charging line for additional functions in the trailer, and the (legally required) reverse light function with a cycle carrier, is not possible.

## 13-pin wiring kits

The 13-pin kit provides the option for further convenient functions such as lights in the trailer, refrigerator operation or reverse light with a cycle carrier:

- Rear lights
- Brake lights
- Turn signal lights
- Rear fog light
- Trailer turn signal light control

- Reverse light
- Permanent positive line
- Charging line

This equips you for all situations from the start.

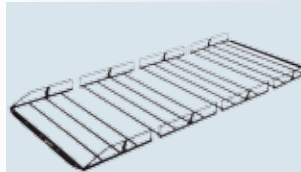

## Additional products from Westfalia-Automotive:

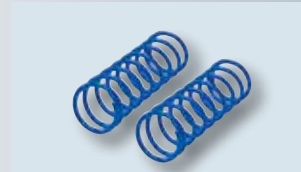

Towbars

Cycle Carriers

Roof racks

Power springs

## Wiring kits

We do not leave you standing in the dark

# Professional Wiring Kits

Safety & Reliability

for ultimate peace of mind

When you fit a towbar you will also need electrics to power the lights on your trailer or cycle carrier or a complete system to power the internal electrics of a caravan, including lights, fridge etc.

Westfalia wiring kits are developed in conjunction with the world's leading motor vehicle manufacturers to ensure they perfectly match each make and model of vehicle. All Westfalia products comply with stringent European Regulations and offer the very best in terms of quality, safety, reliability and performance, giving you the reassurance and peace of mind that they can be used with complete confidence.

## Best brand 7x running

Westfalia-Automotive voted **Best Brand** seven consecutive times.

When choosing their **Best Brand**, readers of **auto motor und sport** voted Westfalia-Automotive the winner in the **Towbar** category.

## The perfect fitting combination

Providing you with the ultimate solution for maximum safety & reliability

### Towbars

### Vehicle specific wiring kits

Detachable and fixed systems

Reliable

OEM quality

Perfect fit

User-friendly

Millions approved

EC approved

Use of original parts

Easy installation

Extremely reliable

Complete product portfolio

Complete functionality through connection to the on-board electrical system

## Universal electrical kits

Can be used on numerous different vehicle types:

- Offering complete support of the vehicles lighting system and some of the comfort functions (e.g. PDC, fog light switch off)

## Practical accessories

Adapter

Westfalia's adapters convert 7 pin electrics to 13 pin and 13 pin electrics to 7 pin

Extension Kit

Adds the auxiliary circuit functions such as battery charging and fridge feed

## Vehicle specific wiring kits

A vehicle specific wiring kit is the recommended system for all modern vehicles. They provide you with all the benefits manufacturers code into their vehicle management systems to make towing a safe & reliable experience.

Consult your towing vehicle's handbook to learn about these enhanced settings, which may include some or all of the important features;

- Activation of the vehicles TSP (Trailer Stability Program) helping to correct the 'snaking' action of a trailer
- Adapted braking settings providing optimal emergency stopping and enhanced assistance on hill starts
- Continuation of the vehicles light health check monitoring system to provide warning of any bulb failures
- Disabling of the vehicle's rear parking sensors to stop unnecessary and distracting 'beeps'
- Disabling of the vehicle's rear fog lights (but not the caravan's!) to avoid distracting rear view mirror glare
- Adapted new gear ratio settings for automatic gear boxes to take account of the extra load being towed
- Disabling of the vehicle's stop / start economy feature to avoid stalling in unsafe locations

Other features that may be adapted include reversing cameras, adaptive cruise control, suspension systems and cooling systems.

A vehicle specific wiring kit can be installed by your towbar fitter and this will ensure that you do not bypass all the important towing safety features manufacturers build into today's vehicles
