bikelande/classic

Discover the new bikelander

The bike rack from Westfalia-Automotive is presented with state-of-the-art hybrid LED lights (not bikelander classic) in an innovative design.

Just like its predecessors, the bikelander scores with:

- space saving folding design
- wide fold down mechanism
- 60 kg payload
- wheelbase of up to 1300 mm

and stays a cycle carrier for all common bike models up to pedelecs and e-bikes.

Furthermore the bikelander excels by its ergonomics and its user-friendliness. In addition to its reduced weight of about 17 kg, the frame holders are removable to bike frames up to 80 mm diameter. Together with the adjusted bow form, different frames are mounted on the cycle carrier with minimal effort.

The bikelander continues to offer additional innovative accessories such as the box, platform and third bike extension rail.

Proven a 1,000 times over –
now made even better

Extension kit for 3rd bike

EASY and QUICK

With the extension kit the bikelander turns easily and quickly into a bicycle carrier for 3 bikes.
