BC60 Cycle Carrier

Errors and omissions excepted. 09/2014

BC60 Cycle Carrier - One for all (and everything)

Compact and carefully planned.

The handling of the BC60 has been tailored entirely to the needs of the customer. It is mounted in mere seconds by simply placing it onto the towball, and then fastened with minimum effort.

After use, it **can be folded up to save space (58 x 69 x 22 cm)** and stored in the matching bag in the trunk, garage or flat.

Since the BC60 is suitable for bicycles with a **wheel base of up to 1300 mm** and can carry loads **up to 60 kg**, it is ideal for heavy e-bicycles and pedeless.

These trendy „best ager“ bicycles are very easy to position and fasten to the BC60 - especially in comparison to placing bicycles on roof racks. Last but not least, the BC60 impresses with the expansion options offered by a diverse range of practical accessories.

Transport bag

Transport box

200 litres of additional storage space: charcoal-coloured plastic box with wheels and removable cover. Mounted in seconds.

Folded up

Transport platform

Mounted in seconds, without tools: capacity for 54 kg of payload such as beverage crates or garden tools.
